***Allowance of Application # 10/762,090***

1. The following communication is in response to applicant's amendment received 2-October-2008. Claims 1-12 are pending in the application. Claims 13-15 are canceled.

***Examiner's Amendment***

2. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee. Authorization for this Examiner's Amendment was given by Chad Terrell (Reg. No. 52,279) on 5-December-2008.

**2.1** In the Claims:

Claim 1            line 4            Change "generating a system model" to --using a computer system

to generate a system model--.

Claim 3            line 6            Change "generating a system model" to --using a computer system

to generate a system model--.

Claim 6            line 6            Change "generating a system model" to --using a computer system

to generate a system model--.

***Reasons for Allowance***

3. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter.

3.1 Claims 1-12 are considered allowable, since when reading the claims in light of the specification, as per MPEP § 2111.01, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claims nos. 1, 3, and 6-12, including: in regard to claim 1, selecting from a plurality of candidate features of a system a set of input features and a superset of the input features and other features by using a baseline significance signature [**defined at** p. 10, Ins. 7-10]; generating a system model by using data corresponding to the selected input features set [p. 10, Ins. 10-12]; maintaining online data corresponding to the superset of the input features and other features collected from the system [p. 10, Ins. 12-14]; determining a new significance signature of the system by using the online superset data to perform a discriminant analysis of the candidate features [p. 10, Ins. 14-17]; and detecting an evolutionary change in the system by comparing the new significance signature and the baseline significance signature [p. 10, Ins. 17-20].

Dependent claims 2, 4, and 5 are deemed allowable as depending either directly or indirectly from independent claims 1, 3, and 6-12.

3.2 The instant application is directed to a non-obvious improvement over the information described in the article authored by Computer Associates, entitled *Comprehensive eBusiness Intelligence*, which discloses two business intelligence technologies, Automated Rules and Adaptive Pattern Recognition, for resolving complex business problems and constructing

Art Unit: 2128

solutions to common problems by utilizing the combined logic and intuitive capabilities inherent in business intelligence.

**3.3** The art of record, either individually or in combination, fails to teach, suggest, or render obvious the specific arrangement of elements in the same combination as now required by the amended claims. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.

### ***Response Guidelines***
